- I knew I wanted to create something super pink and cute
- I started by looking through Pinterest for cartoon car and Mario Kart inspiration, and I decided on a buggy-style car.
- The name of my design is Bubble Buggy. I wanted it to have lots of rounded edges and include the ability to throw bubble gum.
- To begin the modeling process, I stretched out a sphere and then cut into it to form the base shape, adding bubble-like forms on top.
- Getting the body into the correct shape was a little challenging. After creating it, I realized the bottom needed to be flat rather than rounded, so I used a rectangle to cut through and flatten the base.
- The wheels were definitely one of the harder parts of this design.
- It was tricky to position them in a way that looked natural without actually modeling visible axles.
- Designing the bubble gum pieces attached to the back was my favorite part.
- I wanted them to feel fully integrated into the kart, while still keeping the design simple with just a few smaller details.
- For colors, I chose a pastel palette of pink, purple, and blue to match the playful vibe of the name.
- The parachute will have a checkered pattern.
- The small bubble gum balls were especially fun to color because they had many tiny sections where I could add scattered colors.
- Overall, I think the process went really well. With a bit more refinement, especially in the cockpit area, the design could
