

Assignment 1

Kate Craig
Form 3100- Spring 2026

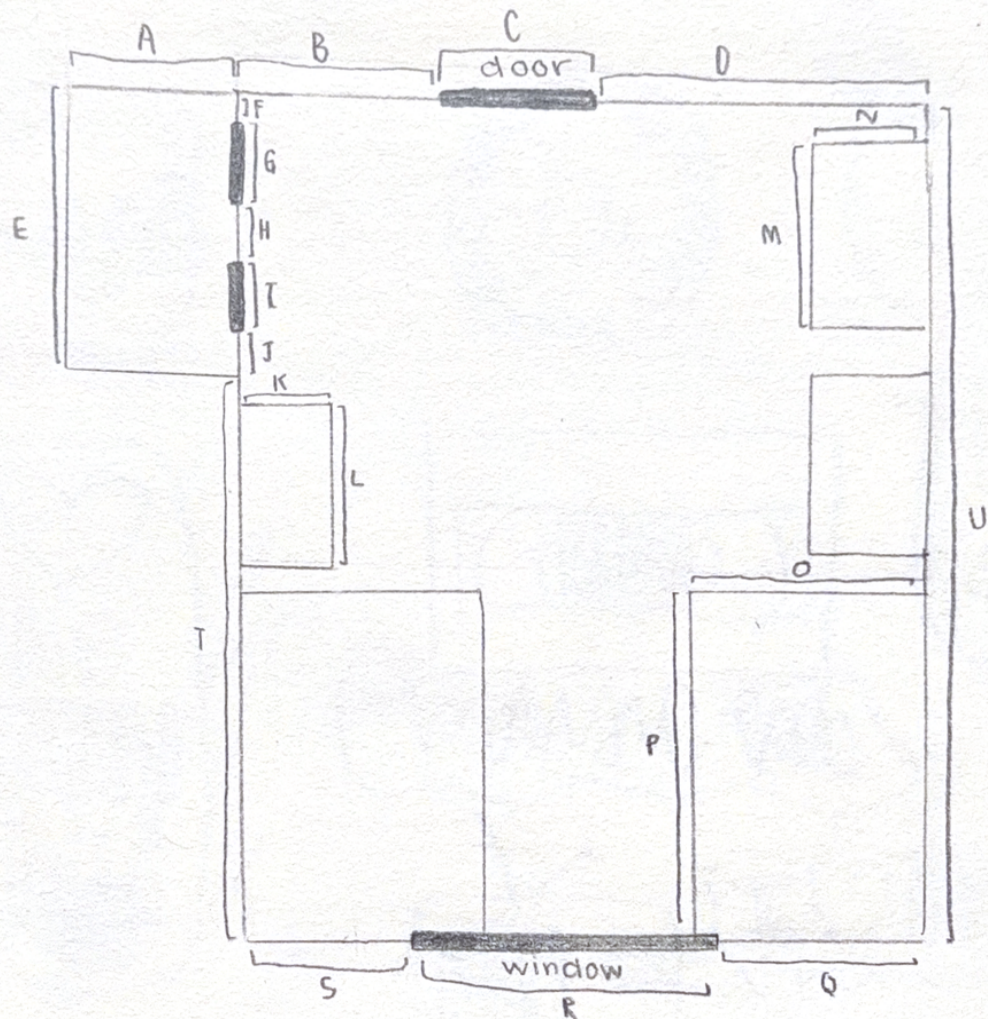

January 25, 2026

Sketches, Notes, and Diagrams

Overall Diagram

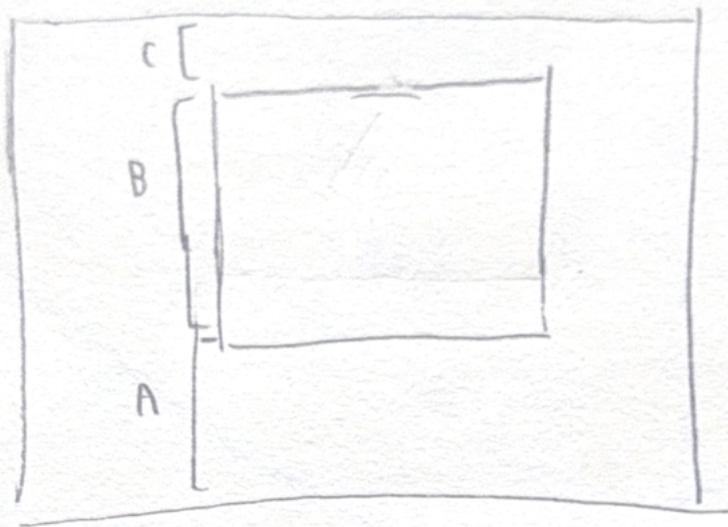

Sketches, Notes, and Diagrams

A: 26in	G: 29in	M: 42.5in	S: 24.5in
B: 21.5in	H: 19in	N: 24in	T: 131.75in
C: 30.5in	I: 29in	O: 42.25in	U: 215.25in
D: 35in	J: 12in	P: 89in	
E: 83.5in	K: 19in	Q: 37.75in	
F: 6.5in	L: 30.25in	R: 53.5in	

Dimensions - Floorplan

Sketches, Notes, and Diagrams

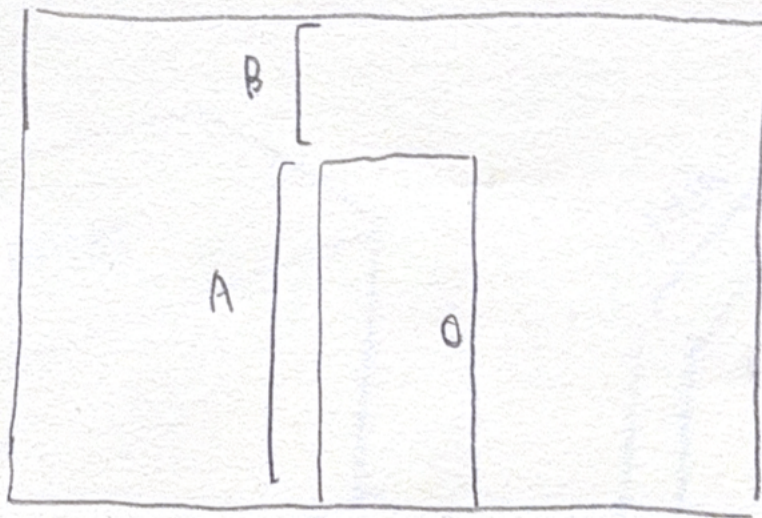

A: 33in

B: 47in

C: 12in

EAST
WALL

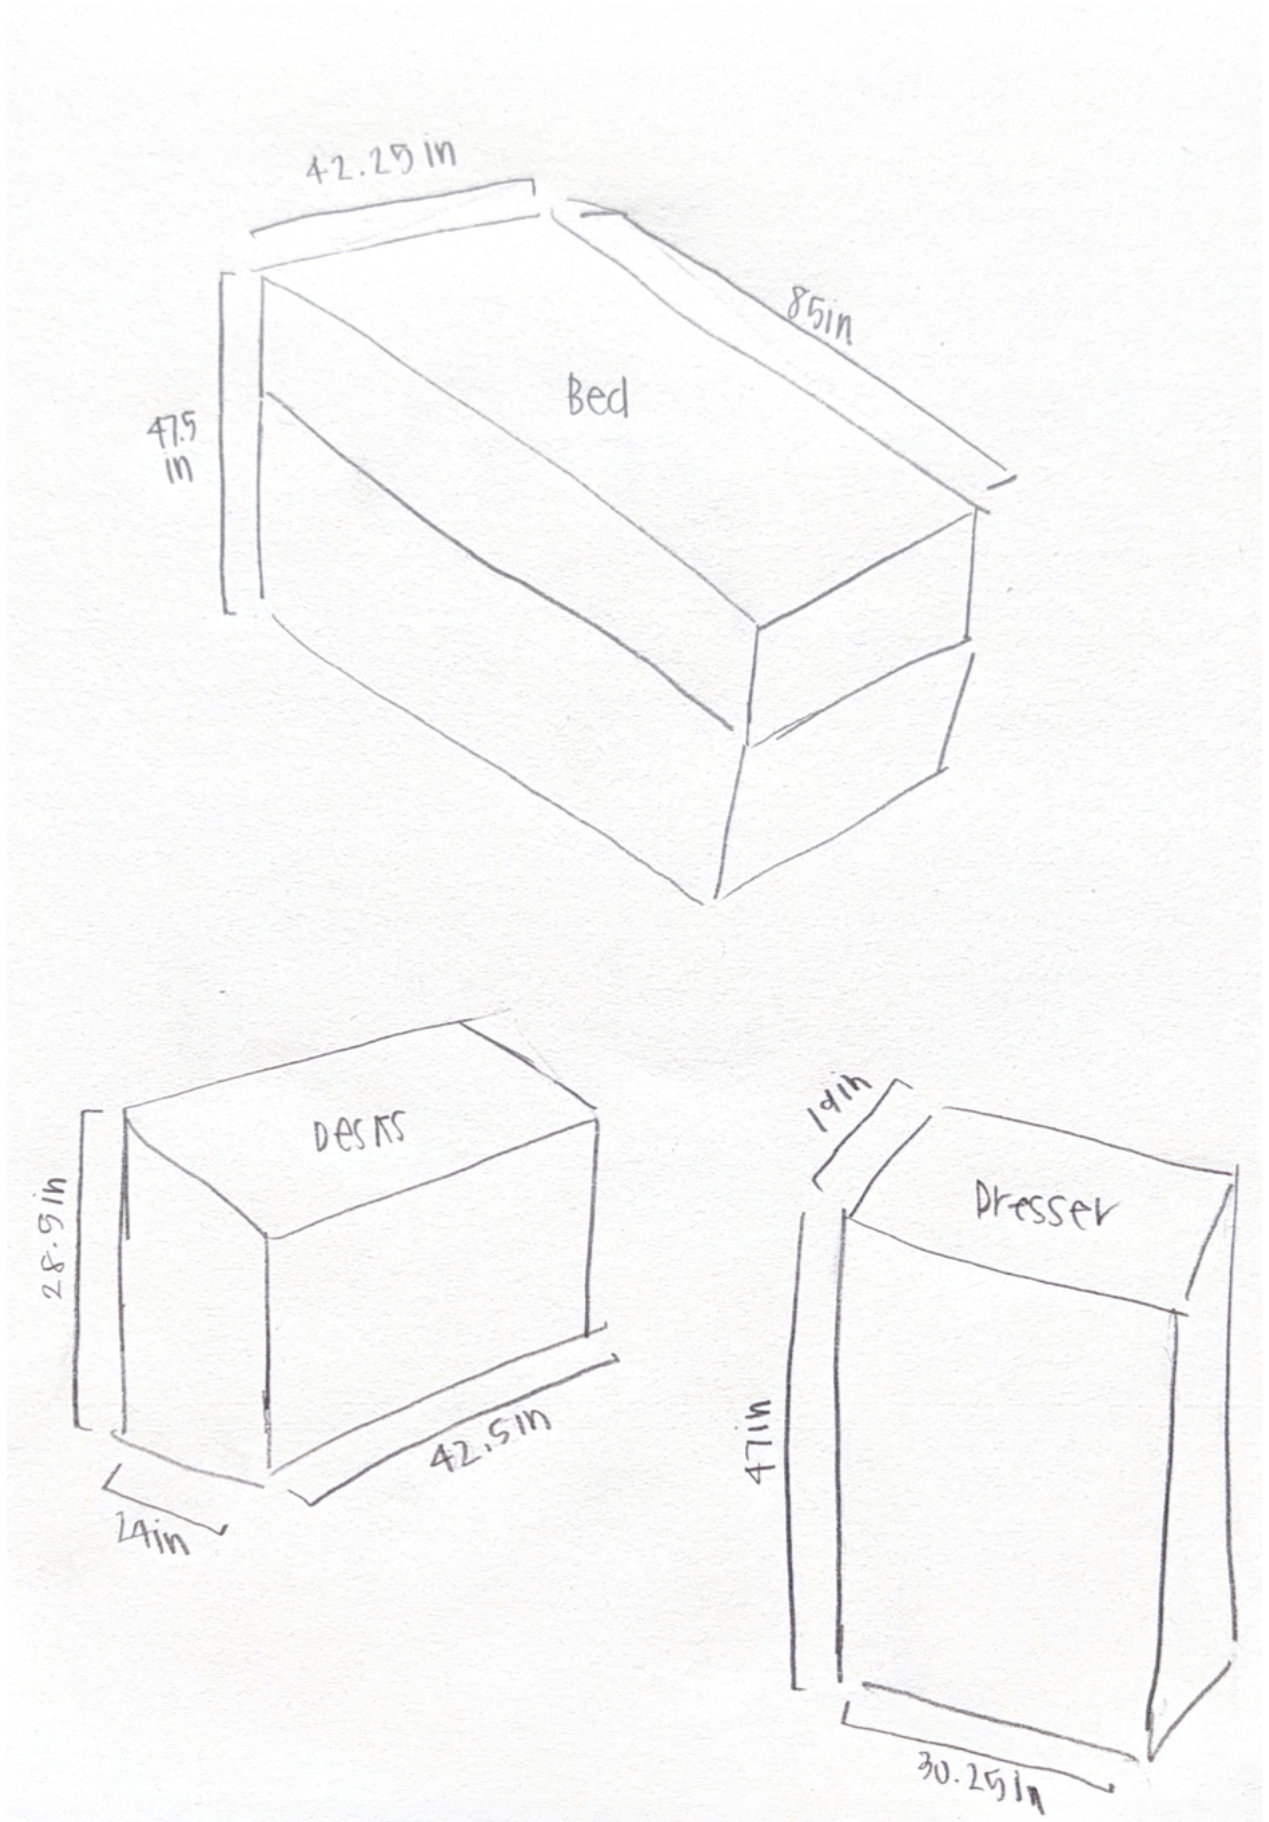

A: 80in

B: 12in

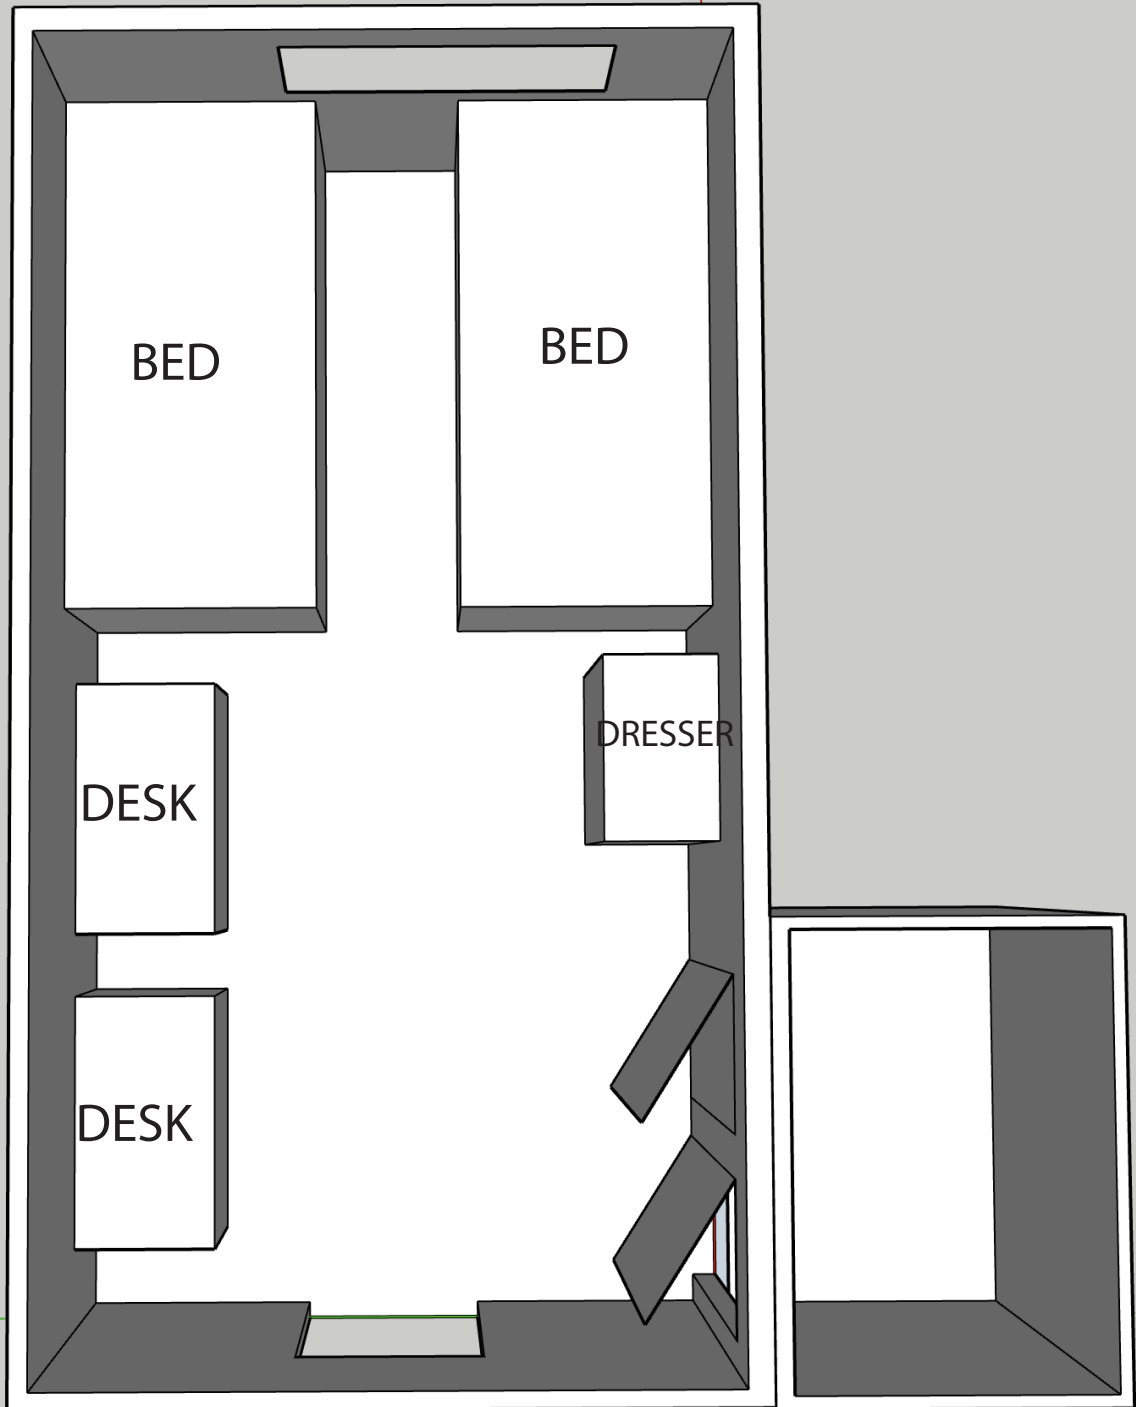

WEST
WALL

Furniture- Desks

Journal

- I had my mom order me tape measures so I could measure out my room.
- I got the box and opened it.
- I drew out a little rectangle on my sketch paper so I could write down the approximate measurements and get an idea for my final sketch.
- Then I ran around my room and measured every little thing.
- My roommate walked in on me holding the tape across the entire room, and she helped me measure.
- My closet was really annoying to measure because it sticks into the room.
- I am including the desks in our room, the two beds, and our big dresser.
- I took all of the measurements and recorded them onto my first draft sketch to help me plan.
- Then I sketched the walls, a general floor plan, and all of the furniture with specific measurements.
- Then I started on the next sketch.
- I finished the second sketch and labeled everything so there weren't lots of numbers on the drawing.
- Got a mouse, yay!
- Now I'm starting on the 3D model process.
- I did the walls and the basics pretty easily. It is actually much easier to 3D model stuff when you have exact measurements.
- I'm just looking at my piece of paper and going off of that.
- I just started working on it again, and I'm tweaking little things. I'm trying to figure out the best way to do the doors.
- I am also going to be including the little closet space that sticks out of our room that was just pulled out of this house.
- The most difficult part was probably getting the doors and windows correct because they are off-center and weird.
- Basically, my entire room is not centered, so I had to make sure the proportions looked correct.
- The desks were easy to do because of their sizes and placement in the room.
- I created an Illustrator artboard.
- I created the outline so I can add the rest of the images and sketches tomorrow.
- I added titles and labels to the pages so it will be really easy to finish up.
- I checked through the 3D model and figured out what images I wanted to include in Illustrator.
- I also scanned my sketches and sent them to my computer to import into Illustrator.
- Now I put all of the sketches and images into Illustrator and organized them. I am going to label my 3D model.
- I just finished adding all of the labels, which is the last part before I add them to my journal!
- Having a mouse is so clutch. I can't imagine doing this without one again like I did last semester.
